WHY CHOOSE PLUMB AND CORING?

EQUIPMENT THAT SETS THE INDUSTRY STANDARD

At Plumb and Coring, our operational capability goes far beyond the industry norm. Our fleet and equipment are carefully selected and maintained to ensure reliability, efficiency, and cleanliness on every project.

STAINLESS STEEL TANKERS FOR SUPERIOR HYGIENE AND DURABILITY

Our tanker units are constructed from stainless steel, providing superior resilience, corrosion resistance, and cleanliness compared to conventional mild steel tankers. This ensures longer service life and improved hygiene standards when handling wastewater.

PROPERLY MAINTAINED FLEET WITH CERTIFIED COMPLIANCE

Our trucks are clean, well maintained, and undergo regular servicing. Each vehicle completes a full Certificate of Roadworthiness (COR) annually, ensuring operational safety and reliability.

FULL SERVICES LIST

DOMESTIC SEPTIC TANK SERVICES

Reliable septic tank pumping, maintenance, and servicing for residential properties.

SEPTIC TANK AND SOAK PIT INSTALLATION

We install complete septic tank systems and soak pits for domestic homes, estates, and commercial developments.

COMMERCIAL SEWAGE TANK PUMPING

We provide scheduled and emergency sewage tank pumping services for commercial buildings, estates, and industrial facilities.

SEWERAGE AND STORMWATER PIPE INSTALLATION

We provide professional installation of sewerage and stormwater piping infrastructure for new developments and system upgrades.

DRAIN JETTING SERVICES

High-pressure drain jetting services to clear blockages and restore proper system flow.

CONCRETE CORING SERVICES

Precision Coring for Structural Accuracy. Clean, controlled coring through slabs, walls, and foundations with diameters up to 200mm.

WHAT SETS US APART?

GREATER REACH, GREATER CAPABILITY

Our vehicles carry both 3-inch and 4-inch pumping systems, along with extended pipe lengths. This allows us to access and service tanks located further from access points, providing greater flexibility than most competitors.

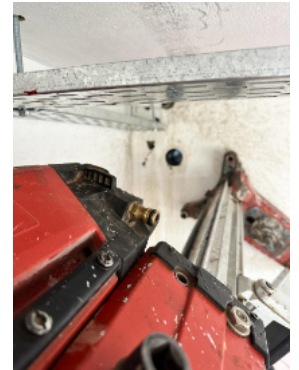

DESIGNED FOR DOMESTIC AND COMMERCIAL ACCESS

We operate specialised tanker units capable of accessing domestic properties with narrow gates, tight driveways, and limited access areas. Our fleet is designed to manoeuvre efficiently in confined residential environments, while still offering the capacity required for larger commercial and estate projects.

CLEAN EQUIPMENT. PROVEN SYSTEMS. PROFESSIONAL RESULTS.

Plumb and Coring provides specialist septic tank, sewerage, coring, and plumbing services for domestic, commercial, and estate environments. With modern equipment, properly maintained tanker trucks, and experienced operators, we deliver reliable solutions while maintaining the highest standards of cleanliness, safety, and professionalism. Whether servicing an existing septic system, installing new infrastructure, or performing precision concrete coring, our team is equipped to handle projects of any scale.
